

OBH-15 MM/MC PHONO PRE AMPLIFIER

With modern amplifiers expected to cater for so many new devices, the phono capability has frequently been one of the features to disappear. At Creek Audio, the engineering team has always been aware of the benefits of vinyl – that is why the company continues to provide a number of phono stage options.

The most recent addition to the range is the OBH-15, combining all that was best in the OBH-8 moving magnet and OBH-9 moving coil phono pre-amplifiers, into one diminutive chassis. Seriously impressive, the new OBH-15 augments any system.

With its enhanced drive capability coupled with lower output impedance, the OBH-15 can now drive longer cables. It has combined the gain stages of the OBH-8 and OBH-9 and caters for both moving magnet and moving coil cartridges, selectable via a simple external switch on the rear panel. It also allows for the connection of two turntables. The OBH-15 can be used in conjunction with the OBH-1 power supply, however, it will sound better with the OBH-2.

The OBH-15 looks the part too! Designed to complement the Creek range of amplifiers, tuners and CD players, the new OBH range features an impressive solid aluminium front panel in a silver finish. The remainder of the 150mm casing is black so the products all but disappear.

SPECIFICATION

	Moving Magnet	Moving Coil
Gain	37 dB	56 dB
Frequency Response	20 Hz – 20 kHz \pm 0.25 dB	20Hz – 20kHz \pm 0.25 dB
Signal to Noise Ratio	-83 dB	-75 dB
Total Harmonic Distortion	< 0.03%	< 0.05%
RIAA Deviation	\pm 0.5 dB	\pm 0.5 dB
Output	250 mV	250 mV
Output Impedance	< 100 Ω	< 100 Ω
Input Sensitivity/Impedance	3.5 mV / 47 k Ω / 220 pF	0.5 mV / 1000 Ω / 3300 pF
Overload Margin	22 dB	20 dB
Mates well with cartridges with	2.5 mV to 5.0 mV output	0.5 mV to 1.0 mV output
Dimensions	150 x 100 x 65 mm	150 x 100 x 65 mm
Weight	360 gms	360 gms

Manufactured in the United Kingdom
