

# THE CREEK A42

## A STEREO AMPLIFIER

▲  
STUNNING PERFORMANCE  
FOR MUSIC, AUDIO/VIDEO  
AND MULTI-ROOM SYSTEMS

The Creek A42 is a power amplifier of the highest caliber, designed and manufactured in the UK. It is ready to meet the demands of most loudspeakers, giving a clear and consistent performance for years to come.

The A42 is the best sounding and most rugged Creek power amp ever made. The 50 watt power rating belies the strong, detailed sound the amplifier delivers. The high quality circuit design features a large toroidal transformer and oversized capacitors. Rapid protection circuits remove sound from your speakers if a fault is detected. A heavy duty relay delays the power-on to protect your speakers. The LED power indicator dims until the amp is ready.

Flexibility is part of the A42 design. You can use the A42 in multi-room situations to power up to two pairs of eight ohm speakers in parallel or four pairs wired in series parallel. It is bi-wire ready with two complete sets of 4mm speaker outputs provided. With the P42 pre-amplifier and its Bridging Module, two A42 amplifiers can be used as bridged mono-blocks with 150 watts available. The amplifier's slim, attractive profile matches the P42 preamp, the 4240 integrated amp and the new Creek CD player making for convenient upgrades.

Creek engineers have produced a multi-purpose design for music lovers. The Creek A42 amplifier proves that accurate, full-bodied sound can be affordable.
